Datasheet: Control-M Output Management Centralize retention and management of business documents Increase customer satisfaction and productivity by providing immediate access to reports, invoices, statements, and other business documents with web-based viewing and distribution using Control-M Output Management.

Control-M Output Management - BMC Software

Control-M is well known for its three-tier architecture. By utilizing networking technology, Control-M components among the three tiers can communicate with each other freely, therefore work together to provide cross platform job submission and tracking, and at the same time allow batch workload to be monitored and managed from a centralized location.
