The glottis is the opening between the vocal folds (the rima glottidis).. This section is empty. You can help by adding to it. (September 2014)

### Glottis - Wikipedia

Vowel backness is named for the position of the tongue during the articulation of a vowel relative to the back of the mouth. As with vowel height, however, it is defined by a formant of the voice, in this case the second, F2, not by the position of the tongue. In front vowels, such as [i], the frequency of F2 is relatively high, which generally corresponds to a position of the tongue forward ...

Why is Diction Important? When the listener hears a song, the words and music create an image, feeling or emotion to which they can relate. When the song is heard repeatedly this creates familiarity and the listener starts to understand the sentiments further, picking up words, even non-sensical ones that encourage participation.
