Chapter 25: The Solar System Introduction to the Solar System Lesson Objectives Describe historical views of the solar system. Name the planets, and describe their motion around the sun. Explain how the solar system formed. Changing Views of the Solar System People have not always known about all the objects in our solar system.

### **Chapter 25: The Solar System Introduction to the Solar System**

25.3 The Inner Solar System The four inner planets are all relatively small and dense, and have rocky surfaces. Like Earth, they all have a crust, mantle, and iron core. The terrestrial planets are similar in structure to Earth. The inner planets are Mercury, Venus, Earth, and Mars.

SOLAR ENERGY 315 diluted form, at a rate of about 220 W/m<sup>2</sup> (see Figure 3-1). In other words, if one square meter were available for conversion of solar energy to electricity (at 100% efficiency), the energy produced would be sufficient for just two or three light bulbs. The challenge of solar energy utilization is to concentrate it.

### **Chapter 17 SOLAR ENERGY**

Our solar system is about 30,000 light years from the galactic nucleus. It takes our solar system about 200 million years to orbit this nucleus.

### **Chapter 25: Beyond our Solar System**

42 CHAPTER 2 The Solar System and Beyond Standards 6.3.6: Use models or drawings to explain that the phases of the Moon are caused by the Moon's orbit around Earth, once in about 28 days, changing what part of the Moon is lighted by the Sun and how much of that part can be seen from Earth, both during the day and night.
