PDF software, business document application, multimedia

An application software (app or application for short) is computer software designed to perform a group of coordinated functions, tasks, or activities for the benefit of the user. Examples of an application include a word processor, a spreadsheet, an accounting application, a web browser, a media player, an aeronautical flight simulator, a console game or a photo editor.

Application software - Wikipedia

Application Services. Is your application portfolio optimized to deliver real business value? At Fujitsu, we continuously improve and transform our customer's applications to ensure they are optimized for today and adaptable for the business needs of tomorrow.

Fujitsu United States - Fujitsu Global

Application software, also known as an "application" or an "app", is a computer software designed to help the user to perform specific tasks. Examples include enterprise software, accounting software, office suites, graphics software and media players. Many application programs deal principally with documents. Apps may be bundled with the computer and its system software, or may be published ...
