Computer science is the study of the theory, experimentation, and engineering that form the basis for the design and use of computers. It is the scientific and practical approach to computation and its applications and the systematic study of the feasibility, structure, expression, and mechanization of the methodical procedures (or algorithms) that underlie the acquisition, representation ...

A computer is a device that can be instructed to carry out sequences of arithmetic or logical operations automatically via computer programming. Modern computers have the ability to follow generalized sets of operations, called programs. These programs enable computers to perform an extremely wide range of tasks.

See Chapter II.C.2.j for additional guidance on the mentoring and data management plan requirements for collaborative proposals. NSF will combine the proposal submission for printing or electronic viewing. To submit the collaborative proposal, the following process must be completed: 29 (i) Each non-lead organization must assign their proposal a proposal PIN.

The Material Measurement Laboratory is one of two metrology laboratories within the National Institute of Standards and Technology (NIST). The laboratory supports the NIST mission by serving as the national reference laboratory for measurements in the chemical, biological and material sciences. Our activities range from fundamental and applied research on the composition, structure and ...
