Summary Subprime mortgage bubble. The precipitating factor for the Financial Crisis of 2007–2008 was a high default rate in the United States subprime home mortgage sector – the bursting of the "subprime bubble". While the causes of the bubble are disputed, some or all of the following factors must have contributed.

Peer-to-peer lending, also abbreviated as P2P lending, is the practice of lending money to individuals or businesses through online services that match lenders with borrowers. Since peer-to-peer lending companies offering these services generally operate online, they can run with lower overhead and provide the service more cheaply than traditional financial institutions.
