Abstract: Today in the conventional power steering systems, it is observed that there are many drawbacks, such as it reduces the engine power in case of hydraulic power steering system, reduces mileage which leads to increased demand of fuels. This increases the operating cost. There is a need to develop such a system which enhances the engine performance and gives better result as of the ...

Network congestion in data networking and queueing theory is the reduced quality of service that occurs when a network node or link is carrying more data than it can handle. Typical effects include queueing delay, packet loss or the blocking of new connections. A consequence of congestion is that an incremental increase in offered load leads either only to a small increase or even a decrease ...
