Sustainable production of renewable energy is being hotly debated globally since it is increasingly understood that first generation biofuels, primarily produced from food crops and mostly oil seeds are limited in their ability to achieve targets for biofuel production, climate change mitigation and economic growth.

### Microalgae for biodiesel production and other applications

Algae fuel, algal biofuel, or algal oil is an alternative to liquid fossil fuels that uses algae as its source of energy-rich oils. Also, algae fuels are an alternative to commonly known biofuel sources, such as corn and sugarcane. Several companies and government agencies are funding efforts to reduce capital and operating costs and make algae fuel production commercially viable.

Astaxanthin is present in most red-coloured aquatic organisms. The content varies from species to species, but also from individual to individual as it is highly dependent on diet and living conditions.

Heavy metal pollution has become one of the most serious environmental problems today. Biosorption, using biomaterials such as bacteria, fungi, yeast and algae, is regarded as a cost-effective biotechnology for the treatment of high volume and low concentration complex wastewaters containing heavy metal(s) in the order of 1 to 100 mg/L.

Applications commerciales Macro-algues. La production de macro-algues reprÃ©sente 88 % de la production mondiale d'algues. Depuis le dÃ©veloppement de l'algoculture et de la mariculture pour beaucoup d'espÃ©ces d'intÃ©rÃªt commercial, elle est devenue largement plus importante que la cueillette : 14,8 millions de tonnes produites en 2005 contre 1,3 million de tonnes collectÃ©es.

But his signature (commercial) discovery, the underlying technology behind Amyris, helped to power a very successful IPO this year, and may well transform, the Brazilian biofuels landscape with its sugar-to-diesel microbiology.

Many of the suggestions below involve the use of animals. Various laws apply to the use of animals in schools particularly any "live non-human vertebrate, that is fish, amphibians, reptiles, birds and mammals, encompassing domestic animals, purpose-bred animals, livestock, wildlife, and also cephalopods such as octopus and squid".
