

neuroanatomy and neuroscience at pdf

The superior cervical ganglion (SCG) is part of the autonomic nervous system (ANS), more specifically it is part of the sympathetic nervous system, a division of the ANS most commonly associated with the fight or flight response. The ANS is composed of pathways that lead to and from ganglia, groups of nerve cells. A ganglion allows a large amount of divergence in a neuronal pathway and also ...

Superior cervical ganglion - Wikipedia

The thalamus (from Greek *θάλαμος*, "chamber") is a large mass of gray matter in the dorsal part of the diencephalon of the brain with several functions such as relaying of sensory signals, including motor signals, to the cerebral cortex, [page needed] and the regulation of consciousness, sleep, and alertness.. It is a midline symmetrical structure of two halves, within the vertebrate ...
