Medical Devices. Specialists in the development and manufacture of mould tools, plastic injection moulded components and the assembly of complex devices for the pharmaceutical, drug delivery, medical, and healthcare industries.

### **Plastic Injection Moulders, Injection Moulding, Cleanroom**

The global medical plastic market size is expected to reach USD 33.6 billion by 2025, according to a new report by Grand View Research, Inc. Rising demand for sterilized plastics for use in the medical industry is expected to emerge as the major factor driving market growth

### **Medical Plastic Market Size Worth \$33.6 Billion By 2025**

Plastics engineering encompasses the processing, design, development, and manufacture of plastics products. A plastic is a polymeric material that is in a semi-liquid state, having the property of plasticity and exhibiting flow. Plastics engineering encompasses plastics material and plastic machinery. Plastic Machinery is the general term for all types of machinery and devices used in the ...

### **Plastics engineering - Wikipedia**

Plastic is material consisting of any of a wide range of synthetic or semi-synthetic organic compounds that are malleable and so can be molded into solid objects.. Plasticity is the general property of all materials which can deform irreversibly without breaking but, in the class of moldable polymers, this occurs to such a degree that their actual name derives from this specific ability.
