Abstract. Food processing is the set of ways and methods used to transform uncooked parts into food or to convert food into different types for consumption by means of people or animals both in the house and by the food processing enterprise.

Different Types of Food Processing Techniques in Industry

ABSTRACT. The aim of this study was to evaluate the influence of high hydrostatic pressure (150, 250, 350, 450, and 550 MPa), applied for 5 minutes, on antioxidant capacity, total phenolic content, color, firmness, rehydration ratio, and water holding capacity of aloe vera gel stored for 60 days at 4 °C.

Causality (also referred to as causation, or cause and effect) is what connects one process (the cause) with another process or state (the effect), [citation needed] where the first is partly responsible for the second, and the second is partly dependent on the first. In general, a process has many causes, which are said to be causal factors for it, and all lie in its past.

Causality - Wikipedia

Misc thoughts, memories, proto-essays, musings, etc. And on that dread day, the Ineffable One will summon the artificers and makers of graven images, and He will command them to give life to their creations, and failing, they and their creations will be dedicated to the flamesâ€¦
