Python Network Programming - Dabeaz LLC

A network socket is an internal endpoint for sending or receiving data within a node on a computer network. Concretely, it is a representation of this endpoint in networking software (protocol stack), such as an entry in a table (listing communication protocol, destination, status, etc.), and is a form of system resource.

Network socket - Wikipedia

Tenouk's C & C++ program examples, source codes and tutorials download page . The Tutorial is in pdf 5.0 and above, source in txt should be opened in unformatted text editor such as WordPad.
